1. Licence Terms

(A) Evaluation Use

("QuickCheck" / "QC" Version)

The terms of this Section 1.(A) are applicable if you have registered for "QuickCheck" / "QC" Version as an Evaluation Use Customer and are also applicable if you got the Product without registration from me or any third party. Subject to the terms of this agreement, I grant to you a non-exclusive, non-transferable license to use the Product solely for evaluation use only. The Product is not allowed to be used with any production system or with any other system, than your own.

Following these restrictions, evaluation is free for a maximum of 90 days since registration date or since you first got the Product from a third party. By end of that period this licence ends and you have to register for a new production licence ("Personal", "Professional" or "Enterprise" Version) appropriate to your type of business and organisation as described in Section 1.(B) and Section 1.(C).

Otherwise, when licence ends, you must have removed the Product from all your systems and backup media.

If you got the Product without registration, it may be technically restricted in some functionality. The product you got by registration will have no technical limitation.

All rights that are not granted to you herein are retained by me.

(B) Private, Non-profit Production Use

("Personal" Version)

The terms of this Section 1.(B) are applicable to you if you have registered for "Personal" Version as a Private Non-Commercial Use Customer. Subject to the terms of this agreement, I grant to you a non-exclusive, non-transferable license to use the Product restricted to client or server systems of your own, that are not running in a commercial context. Following these restrictions, the use of the product is absolutely free and unrestricted concerning time and product functionality.

All rights that are not granted to you herein are retained by me.

(C) Commercial / Government / Other Organisation Use

("Professional" / "Pro" and "Enterprise" Version)

The terms of this Section 1.(C) are applicable to you if you have registered as a Commercial Use, Government Use or other Organisation Use Customer for "Professional" or "Enterprise" Version. They are also applicable in any other use case that is not covered by Section 1.(A) or 1.(B). Subject to the terms of this Agreement, I grant to you a non-exclusive, non-transferable license to use the Product solely for Development and Production Use with the amount of installation bases as specified on my invoice. If not specified, only one installation base is allowed. The product use is restricted to client or server systems of your own.

If you integrate the Product into one of your customer systems or applications, you have to hand over a printed version of these licence terms and your customer has to register for an own licence.

If you or any other party intends to resell the resulting integrated application, then you or this third party must contact me to obtain the appropriate distribution license, even if the application is designed for private users.

All rights that are not granted to you herein are retained by me.

(D) RESTRICTIONS ON USE

You may not lease, rent, resell or sublicense the Software to any third party, or otherwise use it, except as permitted in this Agreement.

You may not disassemble, decompile, reverse engineer or otherwise attempt to determine source code from the Product. Source code is available with the "Enterprise" Version of the product. You are not allowed to give third parties or their employees access to the source code you got with the "Enterprise" Version. If this is necessary, then this third party has to register for the "Enterprise" Version of the Product on its own.

Source code is only provided for studying and better understanding retrieval processes. You are not allowed to create new binaries by using subsets of the source code or the complete source code. If You want to do so, ask for a technology partner licence.

You may not distribute the product binary, except you explicitly received it with a distribution license.

(E) OWNERSHIPS OF RIGHTS

The Product is designed to be integrated to your or your customer's software. But Title, ownership rights and all intellectual property rights in and to the Product shall remain the sole and exclusive property of me.

2. LICENCE FEES

(A) Payment and Taxes.

You agree that any fee paid for using the Product will be total non-refundable and non-cancellable. You will pay all sales, use, VAT and other consumption taxes, personal property taxes and other customer related

taxes (other than those based on my income) unless you furnish me with written proof of exemption.

(B) FOREIGN TAXES

If you download and/or use the Software outside of Germany, you agree that the amounts to be remitted to me are to be the actual amounts due without withholding taxes or other assessments by authorities anywhere in the foreign location, which withholding taxes or assessments you agree to pay. You will promptly furnish me with certificates evidencing payment of such amounts.

3. LIMITATION OF LIABILITY

(A) Freeware ("QuickCheck" and "Personal" Version)

Evaluation Use, Private Use and Non-Profit Use licenced Software is provided gratuitously and, therefore, I and my suppliers shall not be liable for any direct, indirect, incidental, special, punitive or consequential damages.

(B) LIABILITY ("Professional" and "Enterprise" Version)

If you have registered for Commercial or Government Production Use, my aggregate liability to you for any damages caused by using the Product shall not exceed your license fees received by me for the Product.

In no case shall I be liable for any indirect, incidental, special, punitive or consequential damages, lost data or lost profits.

If you have registered for the "Enterprise" Version I am also not liable for any damages that should have been prevented by testing the use case with debugging the Product's source code.

This product is fuzzy and in consequence not designed for integration that effects system security or any other software security. This licence does not allow such integration!

(C) APPLICABILITY

Some States do not permit disclaimers of certain warranties or limitations on certain types of liability under certain circumstances; consequently, some of the foregoing disclaimers and limitations may not be applicable to you, in whole or in part.

If this is the case, you have to cancel registration and are not allowed to use the product.
